A BURG SAFE STORY

MSC Safe Co., Osborne Park, WA recently wrote to us letting us know about the following attack on a BURG-WÄCHTER CombiLine Safe.

"A customer bought a CL40E a little time ago. The safe was fitted in a wall unit of a house on the 1st floor but not bolted to a wall or floor as per the customer's requirements. The house was then broken into!

The thieves threw the safe down the curving staircase (doing major damage to the floor

and walls of the house). They also stole lots of other items from around the house including the owners new \$150k BMW, they put the stolen goods and the entire safe in the BMW and drove away.

Later in the day the thieves placed the safe at the bottom of a large tree and kept driving the BMW in to the safe trying to get into it. In the meantime, the police were following the GPS tracker in the BMW. The police interrupted the thieves smashing the BMW by driving it back and forth into the safe. Some of the thieves were arrested and some ran into

the bushes and got away. The police recovered the now written off BMW and the unopened BURG Safe.

The safe was taken back to Fremantle police station, where MSC were called in to open the safe on behalf of the police and customer to recover the \$100k of jewellery that was still inside the Safe.

The customer ordered another CL40E from MSC (this time bolting it down) but the rigidity of the BURG safe saved the customer a loss of over \$100k worth of sentimental jewellery."

STRONGARM

MX-V

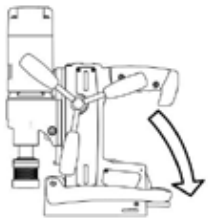

MAGNETIC DRILL PRESS

- **NO POWER NECESSARY**
- **SUPERIOR PERFORMANCE**
- **SMALLER FOOTPRINT**

Cordless Magnetic Drill Press MX-V with switchable magnet technology (MAGRIG), provides superior holding power, weighs less and with a smaller footprint compared to other magnetic drill presses.

Weighing in at only 7 kgs and a footprint of only 190mm x 80mm the MX-V provides **680kg HOLDING POWER** and is effective on thin and thick metal surfaces. The real surprise is it requires **NO ELECTRICITY**.

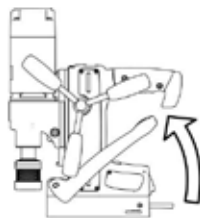

Just flip the switch to stick the rig!
The rig comes standard with drill collar for popular 1/2" drills including Metabo, Bosch, Milwaukee and DeWalt corded drills. Additional collar available for the DeWalt 20V Cordless drill.

Place the MAGRIG to the safe & lock the MAGRIG in place.

Turn on the drill & slowly rotate the handles to drill into the safe.

When drilling is complete, simply release the lock & remove the MAGRIG

- The Pro Kit includes: the **MiniRig** and **2 Safe Drill Templates** (for drilling S&G, LaGard and Diebold mechanical locks), **Universal Dial Puller**, plus a fitted **Custom Case** and it all weighs less than 4.5 kg.
- Precise depth control and accuracy makes safe drilling easy and more profitable. Innovative design, quality construction.
- Quick Disconnect design allows you to remove and replace the MiniRig in seconds from mounting options.
- Best of all, it can pay for itself in one or two openings!

SPECIALISED, HIGH QUALITY TOOLS FOR DRILLING SAFES & VAULTS

Safe Cracker Drill Bits

- **STRONGER CARBIDE** - Specially Formulated Micro-Grain Titanium Tungsten Carbide tips. Unique geometric tips are diamond ground to razor sharpness.
- **STRONGER BRAZING** - Ultra high temperature Copper braze adds strength and reduces tip failure from over heating.
- **STRONGER SHANK** - High grade, Chrome-Moly steel shanks, tempered for extra durability.

LOCKTON LOCKS

HYUNDAI I30 GD PROX KEY PROGRAMMING

The purpose of this month's tech tip is to explain how the XTOOL can program a smart key to a Hyundai i30 GD 2012-2016.

This vehicle is the 1st of the Hyundai/Kia vehicles that do not have a slot in the centre console for programming.

SGT>>> Part number : SK-HY-3B (SK-HY-4B can also be used. Although the Panic button will not work)

XTOOL Path: HYUNDAI \ Program immobiliser remote \ Select from vehicle \ General \ i30GDe\ 2013-2017 \ smart key system

STEPS: ALL KEYS LOST & ADD KEY

1: Turn OFF the ignition switch and press OK to continue. (Press the ignition start button until there are NO dashlights)

2: Turn ON the hazard light switch located in the centre of the dashboard above the radio and press OK to continue.

3: Select program smart keys

4: Input the security code (if you cannot obtain this from the dealership please contact support on 02) 9352-0600)

5: The XTOOL will now prompt you to hold the key vertically and contact the ignition switch (Hold the key as shown in the picture- the positioning of the key is critical ! and push in the ignition switch for 2 secs) a successful message will display on the XTOOL.

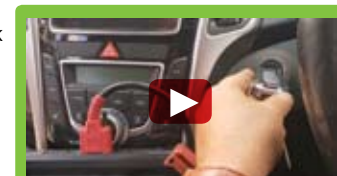

6: The XTOOL will now prompt you to repeat this procedure with the next key.

7: The XTOOL will display the message " Please exit the system, check the smart key programmed or not "press OK and back out of menu's until you see the menu that indicates what system ie; smart key system.

8: Press the remote on the keys programmed to see if they have programmed in, if the remote does not work repeat the procedure again.

9: To start the vehicle put your foot on the brake pedal and cycle the ignition switch - If it's a manual vehicle you will also have to depress the clutch

10: Job Done!

To see the XTOOL in action & programming keys to a Hyundai i30 GD
