## SELF TAPPING SCREWS

Standard across LOCKTON Door Closer Range.

By popular demand from customers; in addition to standard wood screws, LOCKTON Door Closers now include self tapping screws for installation on metal doors. This removes the time required for pre-drilling holes & using alternative screws for the job.

## NEW DRILLING TEMPLATES

Standard across LOCKTON Door Closer Range.

All LOCKTON Door Closers now come with lifesize templates for standard, left & right hinged, and additional parallel arm installation. Drilling templates also have simple instructions to assemble the pieces to complete the task.

## 4D CHIP GENERATION ON KD-X2

The purpose of this months Tech Tip is to demonstrate the usefulness and capability of chip generation on the KD-X2 device.

The latest KD-X2 software release includes chip generation for 4D TP Chips.

4D Chip generation includes :4C Texas , 4D Texas Crypto (All 40 bit -60,61,62 etc.), 4D Texas Crypto (80 bit - 60+, 63+ & G chip etc.)

In the event of an ALL KEYS LOST situation 4D Chip generation can help reduce stockholding as all of the above transponder types can be generated onto a LKP02 transponder.

The other advantage of using chip generation in conjunction with the LKP02 transponder is the transponder is completely RE-WRITEABLE.

This can be a very useful tool when attempting an unknown vehicle as you can change the transponder data multiple times and not have to purchase multiple transponders with different page data.

Once the transponders are successfully generated they can be introduced manually or diagnostically to the vehicle.

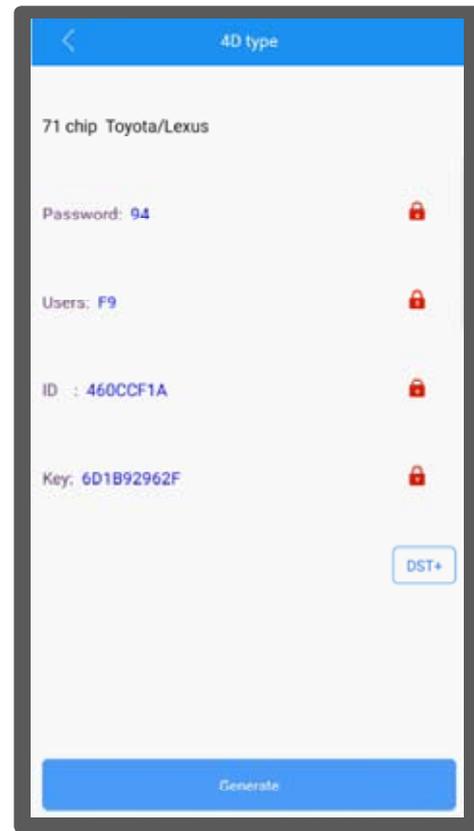

There is also an easy to use option to edit the page data for Advanced Users.

To use this function go to Mobile KD app \ Chip function \ Chip Generation \ 4D Chip Generation & select from the list of transponder types.

Watch this space for future developments of the KD-X2.
